

Riding a Bike

When I go to Phy Ed, I do many different activities. An activity that I enjoy is riding

the trike. I am really good at this, so I can try something new. I am older now and I

am ready for a bigger bike. This bike has two extra wheels on it and they

will keep me safe. These extra wheels are training wheels. I will stay on my bike

with the training wheels. I might feel unsteady at first, but it is ok. The training

wheels will help me stay on the bike. My teacher can help me too.
